

# SUMP PUMP

# PUMPS

No matter how tough your dewatering job may look, you won't find a more economical, more dependable way to clear it up than with these sturdy Ketek pumps.

You can put any size Ketek Submersible Pump at the bottom of just about any water problem – construction sites, mines, trenches, marine salvage, and public works – since it's designed to take dirty water pumping in stride. Even deep excavations pose no problem.

If extreme heads are required, utilize the high head model or simply connect two or more pumps in tandem, it's economical, practical and dependable.

All of these pumps have a silent, non-polluting electric motor, quick-disconnect hose connections and are all easy to handle.

### Features & Dimensions

Size	Weight	Max Pumping Capacity	Voltage	Amps	Head	H/P
